

INGENIERÍA AVÍCOLA, is a family company that has been dedicated to the manufacture and distribution of infrastructures and solutions for the poultry and agro-food industry for more than 40 years.

Customer satisfaction is the priority strategic objective for the Management, a goal that allows the company's other major objective to be achieved: productivity.

For this reason, and in order to achieve these strategic objectives, Ingeniería Avícola has committed to setting up a Quality System in manufacturing and installation processes, with the Management involving themselves 100% in its implementation and on-going improvement and assuming the following commitments:

- To implement and maintain an effective and capable quality system, in accordance with the requirements of international standard UNE-EN-ISO 9001.
- To ensure the provision of the technical, human and financial resources needed to comply with the requirements defined by customers and those that are Legal and Regulatory.
- To provide services that meet the demands and requirements of our Customers, both in terms of the compliance with deadlines as well as in the intrinsic quality of our work.
- To continually improve the effectiveness of the Management System, in order to increase customer satisfaction.
- To provide customers with a full warranty when the work and services are carried out.
- To ensure the capacity and commitment of staff.
- The manufacture of steel structures, complying with the characteristics of Marking Standard CE UNE EN 1090-1 / UNE EN 1090-2.
